

# Level 3 SQF

Gourmet Boutique has once again attained certification as a **Safe Quality Food (SQF) 2000 Level 3 Food Manufacturer** by the independent certifying body, NSF International. Our **score of 96, rates as “excellent”** and places us at the top of an elite group of food manufacturers who have implemented this level of food safety and quality programs.

The SQF Institute, a division of the Food Marketing Institute (FMI), is the leading global food safety quality certification system. SQF is designed as a food safety program, but it also incorporates product quality, a feature that is unique to a certification program of this type. Assuring consistent quality and meeting buyer specifications are important aspects of the buyer-supplier relationship. SQF certification is supported by an increasing number of U.S. and International retailers and food service providers who express a preference for suppliers who implement HACCP based (Hazard Analysis Critical Control Point) food safety and quality management systems.

Gourmet Boutique’s achievement of Level 3, assures you that our food has been produced, prepared and handled according to the highest possible standards at all levels of the supply chain. We are very proud of this accomplishment that positions Gourmet Boutique as a leader among prepared food manufacturers.
